

COMPANY OVERVIEW

Charter Oak Environmental Services is an environmental consulting and engineering company that works collaboratively with clients to provide cost effective and creative solutions, staying on budget and on schedule while achieving regulatory compliance. The professional services division of Charter Oak investigates, designs, executes and monitors environmental site assessment and remediation projects. Charter Oak also provides soil sampling, management and disposal services, hazardous and non-hazardous waste characterization, property transfer program support, LEP services, environmental compliance, environmental permitting, third party review services and litigation support. The transportation and disposal division of the company provides turnkey services for long term contracts as well as project specific needs.
