

Continental Flooring Company, headquartered in Scottsdale, Arizona, was founded in 1979. The company was founded by James G.F. Coleman as a family-owned and operated company and to this day, there are several family members involved in various parts of business operations.

We are a nationwide government contractor principally serving federal and state governmental agencies throughout the world. In addition to our International Division, our Arizona Division concentrates on the public sector and commercial audience. Still to this day, we are driven by the customer and our focus of "Get What You Want, When You Want It" is the basis of many of our business practices. Our markets include:

## **Federal and State Government Agencies**

As government specialists, we provide all types of floor coverings, ceiling systems and acoustical wall panels to our customers including Military Installations, Public Housing, Educational Institutions, U.S. State Department, Veterans Administration Hospitals, Correctional Institutions and other federal or state governmental agencies.

## **Flooring and Ceiling Exporters**

As many of our customers are overseas, we have the ability to provide flooring and ceiling system products for export to government agencies worldwide. Our logistical support allows us to efficiently work with international exporters to provide global distribution of flooring and ceiling system materials.

## **Government General Contractors**

Contractors working on federal or state-funded projects who need a source to procure flooring and ceiling materials work with us on a regular basis to be sure their government customers get the products they specify.

## **Arizona Commercial Contracting**

In 1991, Continental Flooring Company created our [Arizona Division](#) to service State of Arizona customers. In addition to federal and state agencies, we routinely work with General Contractors, Project Managers, Public Hospitals and Architects.
