

ABOUT US

ClearWater Industries is a unique combination of knowledge, experience, and stability. We use these assets to specifically meet the demands of the Water Treatment Market.

We are a regional Water Treatment Company specializing in boiler water, cooling tower water, closed loops, and glycol applications, all located inside a 9,000 square foot facility in Shelton, CT.

We stock all of the chemical formulations for immediate delivery and inventory the products so the customer does not have to. All of our service technicians are knowledgeable and well equipped to maintain our Water Management Programs in a professional manner.

We are very aware of the everchanging advances in technologies and are at the fore front to best suit our customers.
